600 X 1200
DOUBLE CHARGE

**DOUBLE
CHARGED**
VITRIFIED TILES

Double Charge tiles have very long life and are scratch proof with more durability. They are made up and manufactured by infusing two layers of tiles. It has different phase and body where the top layer design is the mixture of raw material infused with color pigment pressed to the base layer under high pressure.

**POLISHED
GLOSSY**

GLAZED VITRIFIED TILES

DOUBLE CHARGED VITRIFIED TILES

Double charged vitrified tiles are further processed to apply two layers of a powdery substance on the surface of the tile. This substance is made of carefully selected natural minerals, clay and other materials, which gives the tile its unique look and feel. The result is a tile with a smooth, glossy finish that is highly resistant to scratches and water damage. When compared to glazed vitrified tiles, double charged tiles are far more resistant to surface damage and wear and tear. The double layer of powdery substance on the tile's surface makes it more resistant to oils, stains and other liquids. The double charged tiles also have a higher degree of hardness than their glazed counterparts, making them more resistant to scratches and chipping.

Elegant Aesthetics

Double charge top layer body is 3 to 4 mm thick.
A double charged tile is a type of vitrified tile that is available in a variety of colors and sizes, making it widely used in homes, offices, and public spaces.
